

Are you providing unpaid care for someone with *both* cancer and dementia?

I am looking for carers to complete an interview about their experiences of caring for someone with both cancer and dementia.

- Participation will take approximately **60-90 minutes**
- The findings will be used to inform an intervention for carers of people with cancer and dementia at Carers Leeds
- Refreshments will be provided, and any out of pocket expenses and carer replacement costs will be covered

You can take part if:

- You are providing (or within the last 5 years have provided) unpaid care to someone with both cancer and dementia
- You are aged 18+
- You can speak fluent English

This research is being conducted by Mollie Price, a PhD student at Leeds Beckett University. The research has ethical approval from the Psychology Local Research Ethics Committee at Leeds Beckett.
